

On the cover - the chemical structure of caffeine. Chocolate is sweeter but coffee will help you more at MIT!

*We could build you a Dome out of chocolate,
And look up the ASCII for "heart",
Or build you a pocket-sized rocket,
And graph f(love) on a chart.*

*We could spoof real websites and spend sleepless nights,
On a hack that we hope lets you say:
Class '13 is sure to be awesome!
Hope to see you in Boston, MA!*

Good luck! We hope to get into MIT and see you there!
